

BIG money!

Summer Job

We need an electrical engineering undergraduate or graduate student to help us prepare the *ENDEAVOR LAB* for next fall. What do you get out of it?

- Be the first to experience *ENDEAVOR*!
- Play with the brand new, expensive, and ultra-cool lab hardware from NI, Keysight, and more!
- Get a jump on labs from classes you need to take anyway!
- Earn \$12/hr for 30-40 hrs/week and 10-12 weeks!
- Become one with all things electrical!
- Help a couple of desperate assistant professors make useful classes that students actually enjoy!

You will be helping us prepare, refine, and implement lab modules for the following classes. If you have any interest in these classes, this work will be **very** beneficial in your future.

- ECEN 4533: Digital Communications
- ECEN 4523: Communication Theory
- ECEN 5573: Wireless Communication
- ECEN 4613: Microwave Engineering
- ECEN 5833: Fiber-optic Communication Systems
